Re: Proposed Wind Turbine in Falmouth Technology Park

Dear Chairman Flynn,

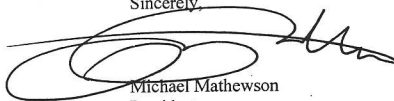

The Falmouth Technology Park Association (FTP) would like to express support for the installation of a wind turbine in the park, as proposed by Notus Clean Energy, LLC.

The FTPA is comprised of businesses operating within the Falmouth Technology Park. Mr. Daniel Webb has provided updates regarding this project at FTPA annual meetings since 2005. At a special meeting on 14 November 2007, he presented the latest status report including photo-simulations and the project web site: www.notuscleanenergy.com

Having reviewed the project, we feel that the Falmouth Technology Park is an appropriate location for this project and provides tangible benefits to our region. Increased capacity for the electricity grid, as well as, reduced air pollution and carbon emissions from other generators are two benefits. In addition, clean, locally generated energy reduces the flow of US energy dollars to foreign nations, benefiting our national economic and environmental security.

We encourage EDIC and the Town of Falmouth to support and facilitate this project during the permitting process.

Sincerely,

Michael Mathewson
President
Falmouth Technology Park Association
